

Boston Makmur Gemilang Data Engineer Test

Summary : in the last part we have managed to put the relationship for each table, in this section we are going to visualize the data

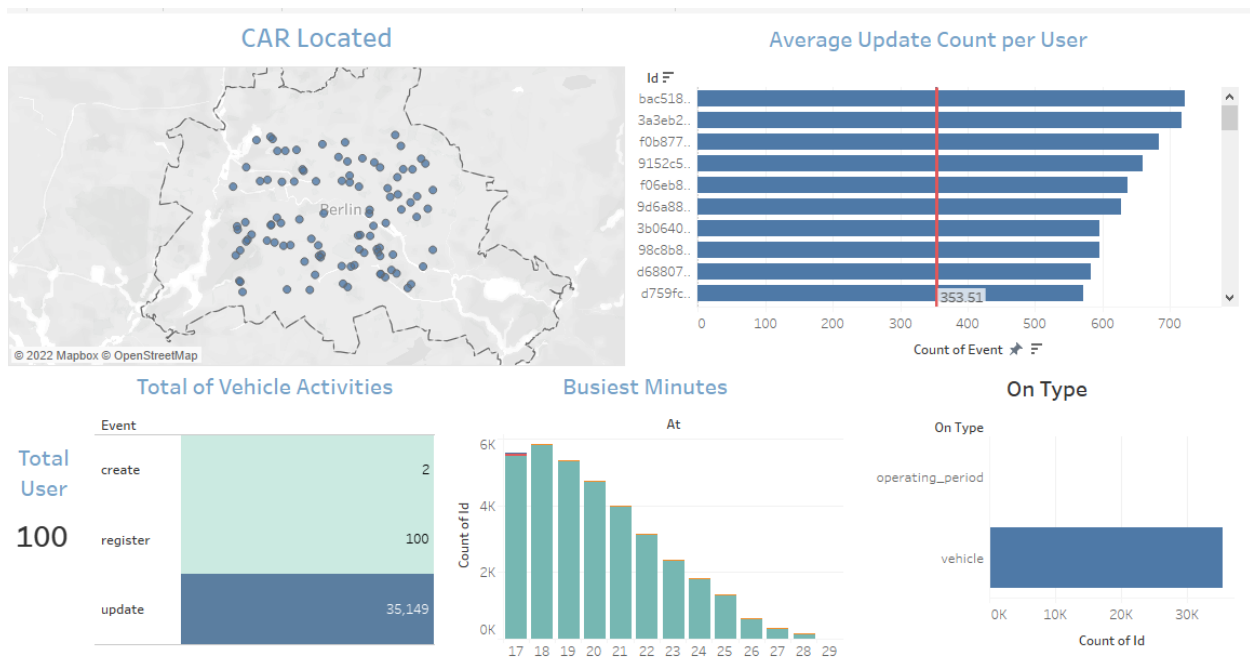

Details:

Tools: Tableau Public

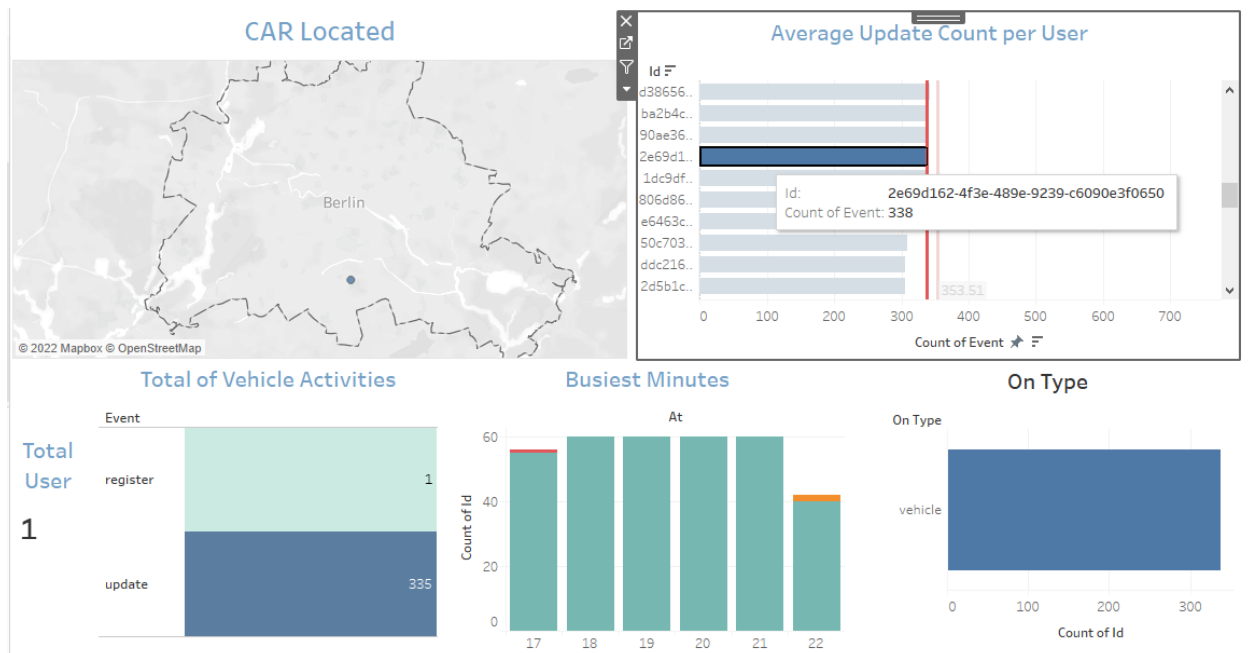

Links:

https://public.tableau.com/views/BostonMakmurGemilangTest/Dashboard?:language=en-US&publish=yes&:display_count=n&:origin=viz_share_link

Dashboard:

Explanations: the dashboard contains the data of the located Car positions, vehicle activities, average update count per user, busiest minutes (in what particular minutes that user done the most event), total user, total event activities summary.

We can also use the slicing method, by choosing the individual user, it will bring up all of the user information, such as their total activities, minutes active, and location.

Thank you for your attentions.
